LONGLIFE III 5W-30

FULLY SYNTHETIC ENGINE OIL WITH QFX TECHNOLOGY

A premium, high-performance, low-ash engine oil for petrol and diesel engines; specially developed for long-life service intervals and vehicles with diesel particulate filters. Approved for Audi, BMW, Porsche, SEAT, ŠKODA and VW, also suitable for Mercedes-Benz.

Description

Quantum Longlife III 5W-30 is a premium, high-performance engine oil designed for passenger cars and light commercial vehicles and manufactured using Quantum QFX technology. QFX provides significant performance benefits compared to conventional oils. These benefits include the highest performance for the entire oil drain period, improved fuel economy, reduced wear and easier cold starts even at very low temperatures.

Application

Quantum Longlife III 5W-30 satisfies the requirements of vehicles fitted with exhaust gas aftertreatment devices such as SCR and DPF. As well as being approved for use in VW, Audi, BMW, Porsche and ŠKODA, Quantum Longlife III 5W-30 is also suitable for use in any vehicle where ACEA C3 is the requirement. It should only be used in diesel engines running on low sulphur fuel. Quantum Longlife III 5W-30 will mix with other oil but to gain the full benefit and to fully utilise the QFX Technology, it is recommended to change the oil completely when changing to the Quantum grade.

Key Points

Improves performance by enabling:

- **Faster oil circulation for easier start-ups**
- **Lower fuel consumption**
- **Reduced oil consumption**
- **Better engine protection by use of advanced additive technology.**
